

GAGAN KUMAR S

SOFTWARE ENGINEER – BACKEND DEVELOPER

sgagankumar@gmail.com [\(+91\) 80731 30198](tel:+918073130198) www.sgagankumar.dev linkedin/sgagankumar [Bangalore, India](#)

PROFESSIONAL EXPERIENCE

Senior Software Engineer **TRACXN** **Apr 2025 – Present**

- Designed and built a scalable entity service for company intelligence, using MongoDB (primary store) and Elasticsearch; served **45M+ API calls daily** across dashboards and integrations.
- Optimized large-scale graph models for company ownership and legal entity structures, enabling efficient traversal, subtree extraction, and reachability queries across **50K+ graphs (100K+ nodes each)**.
- Built LLM-powered pipelines for news-to-business-event tagging, processing **30K+ articles daily**; implemented relevance filtering, **multi-label event classification**, and company entity extraction, reducing manual effort and turnaround time.
- Developed data ingestion pipelines for Indian regulatory filings, processing **tens of millions of documents** across 4 form types; handled complex PDF parsing including **XFA and flattened formats**.
- Built backend pipelines to ingest **Google Play Store data**, map apps to companies, and generate **scoring models** to identify high-potential mobile-first startups.
- Leading a team of 5 engineers, driving backend and data system design and delivery.

Specialist Programmer **Infosys Ltd.** **Sept 2020 – Sept 2023**

- Built a dynamic application framework for configurable data processing and visualization widgets, reducing backlogs by **70%** and improving flexibility across modules.
- Improved distributed data processing using Kafka, increasing system resilience during peak demand.
- Optimized backend caching with Redis, reducing resource utilization by **30%**.
- Selected for [Power Programmers @ Infosys \(Top 1%\)](#), an elite engineering track within the organization.

SKILLS

Languages: Java, Python, SQL

Backend: Spring Boot, REST APIs, Kafka, Task Orchestration

Databases : SQL Databases, MongoDB, Redis

Core CS: Data Structures, Algorithms, System Design, Design Patterns

AI : LLM Applications, Prompt Engineering

EDUCATION

Masters of Science in CS **Scaler Neovarsity** **2024 - 2025**

- Currently pursuing a remote program in Computer Science accredited by [EHEA](#).

Bachelor of Engineering in CS **SJB Institute of Technology** **2016 - 2020**

- Graduated successfully with First Class with Distinction scores under VTU

PROJECTS

- Ghost Car** (2020). Fully functional model of a Level 4 Autonomous Car. OpenCV, ML, Raspberry Pi. [Details](#)
- AgriCloud** (2018). IoT based solution to track agricultural soil and water metrics. Presented and won at several hackathons. Arduino, Data Analysis, Java [Details](#)

ACHIEVEMENTS

- Solved 1,000+ competitive coding problems and earned 24 badges on platform [Leetcode](#) and [Scaler](#).
- Secured third-place position in a 24-hour state level hackathon.
- Presented at a State Level Mentoring Session for Building PoCs, organized by Innovation Cell Ministry of HRD, Govt. of India.
- Authored a publication on autonomous vehicles featured in the International Journal of Engineering and Applied Science and Technology ([IJEAST Vol.5 Issue 3](#))
